

MK3 IBCL SPX Clamplock

For over 30 years the SPX Clamplock has delivered safe and reliable service in railway infrastructure worldwide. The upgraded MK3 Clamplock has again been redesigned to ensure that it exceeds the requirements for the modern day railway environment. Improved functionality, reduced installation time and performance enhancement allows for the MK3 Clamplock to deliver performance and cost savings in line with the requirements of Network Rail.

Our development of the Clamplock continues with MK4 and MK5 versions being developed with railway infrastructure owners. This next generation of Clamplock allows for enhanced maintenance-free and ancillary system options to be supplied in one ship-and-fit kit.

- Reduced maintenance
- Stainless components for extended life and durability
- New Double Acting Ram, removes CTB Packing and A-Bar adjustment
- Roller on Hollow Bearer for controlled slide chair friction
- New auto-lube system for improved flow and lubrication, leak-free fitting
- Reduced lubricating sensitivity
- High modular compatibility
- High MTBSAF

RCPL Rapid Commissioning

Available in both MK2 and Mk3 Clamplock configurations, this unit allows for the use of quick connect plug couplers, saving time in connections. The unit is fully compatible with all versions of Clamplock and maintains high IP rating while being wired to remove the risk of cross pin connections.

- Available with MK2 auto lube System
- MK3 extended life components
- MK3 high vibration rating
- MK2 compatibility
- Rapid Commissioning
- Moulded cable
- Plug coupled

BR817 Rapid Commissioning Power Pack

Available worldwide, the SPX BR817 Rapid Commissioning Power Pack has become the standard option for infrastructure fitment around the globe. Compatible with Network Rail standard cabling, as well as a number of bespoke configurations, this power pack is designed to reduce track access time to a minimum.

Available in a wide range of AC / DC configurations and supplied with brushless technology, performance and flexibility is built in as a standard feature. With plug and play options, as well as quick coupler installation, the BR817 Rapid Commissioning Power Pack offers a starting point for plug and play operations when matched to the RCPL Rapid Commissioning Lock and Detector assembly.

- Various configurations available
- Spring Return Solenoid
- Brushless motor
- Left in Manual secondary cover
- Rated life of 1 million operation cycles
- CE Declaration of Incorporation
- Quick access inspection point
- Maintenance free
